

WATER QUALITY STEWARD CHECKPOINT 1

Matching—Write the correct number beside each description.

- | | |
|--------------------|---|
| 1) Adhesive | _____ A property of water that separates substances into their component parts at the molecule level. |
| 2) Surface Tension | _____ The molecular attraction of water to other surfaces such as glass and plastic. |
| 3) Dissolution | _____ The force of gravity on large amounts of water causes floods, not the intermolecular forces between individual water molecules. |
| 4) Cohesion | _____ The human body |
| 5) Surface Water | _____ Any chemical substance or organic waste that contaminates air, soil, or water |
| 6) Pollutant | _____ A property of water causing a "skin" on the surface of water allowing lightweight objects to float on it. |
| 7) 75% Water | _____ The earth's surface |
| 8) 65% Water | _____ Bay, bayou, creek, gulf, lake, pond, ocean, river |
